Samigo – Bug in creating assessment type

https://oncourse.iu.edu/portal/site/SP10-IN-UITS-PRAC-20794
Oncourse - 2.6.r74086 - Sakai (r74086) - Server esappo01
Win7, IE8

http://qa6-us.sakaiproject.org/portal/site/!gateway/page/!gateway-700
LocalSakaiName - BRANCH - Sakai 2.6.x - Server localhost

Creating a new assessment type, (template), works fine as long as a default type is not clicked on. I don't have the permissions (admin) to edit a default assessment type, but am able to create new assessment types. When I click on a default type, even though I can uncheck/check boxes, there is no Save button, only Cancel. Since I'm not an admin, this is no problem. The problem comes when I then try to create a new assessment type after clicking Cancel for a default assessment type. Now the new assessment type doesn't have a Save button either. I have to click on something else in the menu or on "Assessments", then go back into Assessment Types, and then am able to create a new type again.

This problem also occurs on Generic Sakai.

Steps to reproduce:
1. Click Tests & Surveys Beta -> Assessment Types
2. Fill in the Title for a new assessment type and click Create
3. Edit Assessment Type page opens, make setting changes, click Save
4. Back on Assessment Types page, click a default assessment
5. Edit Assessment Type page opens, click Cancel (no Save button for non-Admin)
6. Back on Assessment Types page, fill in the Title for a new assessment type and click Create
7. Edit Assessment Type page opens but there is no Save button to save the new type; click Cancel
8. Click on any other menu item on the left, (Forums, Messages, etc.)
9. Click on Tests & Surveys Beta -> Assessment Types
10. Fill in the Title for a new assessment type and click Create
11. Edit Assessment Type page opens and you are now able to save your new assessment
