Notes for TSB Event Log (TSBEL-2.1)

Notes

- The user accessed this screen by clicking the "Event Log" link on the TSB home page.
- The page will display an event log of TSB assessment activity, with the following information: assessment title, user ID, date started, date submitted, duration and errors.
- By default, the system will display 20 log entries per page.
- The following columns will be sortable: Title, UserID, Date Started, Date Submitted, Errors. When clicked, the system will sort each column as follows:
 - * Title (first ascending alphanumeric order (A to Z), then descending alphanumeric order (Z to A))
 - * UserID (first ascending alphanumeric order (A to Z), then descending alphanumeric order (Z to A))
 - * Date Started (first descending alphanumeric order (Newest to Oldest), then ascending alphanumeric order (Oldest to Newest))
 - * Date Submitted (first descending alphanumeric order (Newest to Oldest), then ascending alphanumeric order (Oldest to Newest))
 - * Errors (first ascending alphanumeric order (A to Z), then descending alphanumeric order (Z to A))
- Upon leaving/re-entering the Event Log, the system will switch back to the default sort (descending order by Date Started).

Previous/Next

- If the event log contains more than 20 entries, then the system will display "< previous" and "next >" links.
- Upon clicking "next >", the system will display the next 20 entries.
- Upon clicking "< previous", the system will display the previous 20 entries.
- If there are no additional entries to display, then the "next >" link will not be clickable.
- If there are no previous entries to display, then the "< previous" link will not be clickable.

Search

- The system will display a search text box on the page, providing the ability for the user to filter log entries by student.
- The following text will display in the search text box by default: "Enter Lastname, Firstname, or UserID". Upon clicking in the text box, the system will remove this text.
- Upon entering search terms and clicking the "Search" button, the system will search the Name field in the list of log entries for the text entered in the search text box and will display the results below.
- Upon clicking "Clear", the system will replace the text in the search text box with the default text of "Enter Lastname, Firstname or UserID" and will display all log entries rather than the filtered list.
- If there are no results from the search, the system will display "No results found for "text"", where "text" represents the text entered by the user in the search text box.

Title

- There is a 13 character limit for the Title. Once the Title reaches 13 characters, the system will truncate the title and display an ellipsis. Upon clicking the information icon () to the right of the title, the system will display the title in its entirety followed by the ID for the assessment.

Information Icon ()

- On hover, the system will display the assessment ID as well as the assessment title if the assessment title has been truncated.

Notes (cont.)

Date Started

- By default, the system will sort the event log entries in descending alphanumeric order (newest to oldest) by Date Started.

Errors

- If there are no errors present with a specific log entry, 'No Errors' will display for the 'Errors' field
- If there are errors present with a specific log entry, a short description of the specific error will appear in the log entry.

Auto submit

- The system will display an asterisk (*) to the right of the Date Submitted field for an assessment that was submitted by the system.
- The system will display the following legend in italics at the bottom of the screen: *"* Indicates that an assessment was auto submitted"*
