## Notes for TSB Event Log (TSBEL-1.1)

### Notes

- The user accessed this screen by clicking the "Event Log" link on the TSB home page.
- The page will display an event log of TSB assessment activity, with the following information: assessment title, user ID, date accessed, date submitted, duration, errors and ip address.
- By default, the system will display 20 log entries per page.
- The following columns will be sortable: Title, UserID, Date Accessed, Date Submitted, Errors. When clicked, the system will sort each column as follows:
  - \* Title (first in ascending alphanumeric order (A to Z), then in descending alphanumeric order (Z to A))
  - \* UserID (first in ascending alphanumeric order (A to Z), then in descending alphanumeric order (Z to A))
  - \* Date Accessed (first in descending alphanumeric order (Newest to Oldest), then in ascending alphanumeric order (Oldest to Newest))
  - \* Date Submitted (first in descending alphanumeric order (Newest to Oldest), then in ascending alphanumeric order (Oldest to Newest))
  - \* Errors (first in ascending alphanumeric order (A to Z), then in descending alphanumeric order (Z to A))
  - \* IP Address (first in ascending alphanumeric order (Smallest to Largest), then in descending alphanumeric order (Largest to Smallest))
- Upon leaving/re-entering the Event Log, the system will switch back to the default sort (descending order by Date Accessed).

### Previous/Next

- If the event log contains more than 20 entries, then the system will display "< previous" and "next >" links.
- Upon clicking "next >", the system will display the next 20 entries.
- Upon clicking "< previous", the system will display the previous 20 entries.
- If there are no additional entries to display, then the "next >" link will not be clickable.
- If there are no previous entries to display, then the "< previous" link will not be clickable.

### Search

- The system will display a search text box on the page, providing the ability for the user to filter log entries by assessment title or by student name.
- The following text will display in the search text box by default: "Enter Title or Name". Upon clicking in the text box, the system will remove this text.
- Upon entering search terms and clicking the "Search" button, the system will search the Title and Name fields for the text entered in the search text box and will display the results below.
- Upon clicking "Clear", the system will replace the text in the search text box with the default text of "Enter Title or Name" and will display all log entries rather than the filtered list.
- If there are no results from the search, the system will display "No results found for 'text'", where 'text' represents the text entered by the user in the search text box.

### Filter By

- System will display two options for the instructor to filter by: Title and Name.
- The filter options for Title will be 'All Assessments' and a list of assessments with logged events in ascending alphanumeric order (A to Z).
- The filter options for Name will be 'All Participants' and a list of participants with logged events in ascending alphanumeric order (A to Z) by last name.

### Title

- The system will display the title of the assessment in this column.
- There is a 13 character limit for the Title. Once the Title reaches 13 characters, the system will truncate the title and display an ellipsis. Upon clicking the information icon (  ) to the right of the title, the system will display the title in its entirety followed by the ID for the assessment.

### Information Icon ( )

- On hover, the system will display the assessment ID as well as the assessment title if the assessment title has been truncated.

## Notes for TSB Event Log (TSBEL-1.2)

### Notes (cont.)

#### Date Accessed

- By default, the system will sort the event log entries in descending alphanumeric order (newest to oldest) by Date Accessed.

#### Errors

- If there are no errors present with a specific log entry, 'No Errors' will display in the 'Errors' field.
- For assessments submitted by the user, the system will display 'No errors (User submit)'.
- For timed assessments that are submitted automatically when time is up, the system will display 'No errors (Timer submit)'.
- For assessments that are submitted via the batch process, the system will display 'No errors (Auto submit)'.
- If there are errors present with a specific log entry, the system will display a short description of the specific error.

#### IP Address

- System will capture the IP address of the machine a student is using upon entering an assessment and will display that IP address in the event log next to the related event.
- If a student re-enters an assessment, the system will create a new event and will include the IP address of the machine the student is using upon entering the assessment and will display that IP address in the event log next to the related event.
- If the system is unable to capture a student's IP address for a given event, then the system will display "Unavailable" in the IP address field next to the related event.

## Notes for Title Filter (TF-1.1)

### Notes

- Upon selecting the drop-down for the 'Title' filter, the system will display an 'All Assessments' option at the top of the list, followed by the list of assessments with logged events in ascending alphanumeric order (A to Z).
- Upon selecting 'All Assessments', any previous filters will be removed and the system will display the list of events for all assessments.
- Upon selecting an assessment to filter on, the system will display the list of events for the specified assessment as shown on the Filter Event Log by Title screen (FELT-1). The system will also add an identifier to the Search text box, to indicate that the list is filtered by title and the search will only search within this filter, as shown on the Filter Event Log by Title screen (FELT-1).

## Notes for Filter Event Log by Title (FELT-1.1)

### Notes

- On this screen, the instructor has selected 'Reading Quiz 3' for the Title filter.
- Upon selecting 'Reading Quiz 3', the system will perform the following actions:

- \* Filter the list of events to show only those events for 'Reading Quiz 3'.
- \* Add an indicator to the Search text box with the text 'Reading Quiz 3'.
- \* Replace the default text in the Search text box with 'Enter Name'.

**Note:** When a filter is applied other than 'All Assessments', the system will no longer allow the user to search on the filtered field since the system is only displaying events for one assessment.

- Upon entering a search term and clicking 'Search', the system will search the filtered results for the name that was entered. The system will not search outside of the filtered results.
- Upon clicking the 'x' on the 'Reading Quiz 3' identifier in the Search text box, the system will perform the following actions:
  - \* Remove the 'Reading Quiz 3' identifier from the Search text box and replace the default text in the Search text box with 'Enter Title or Name'.
  - \* Replace the 'Reading Quiz 3' text in the title filter with the default text of 'Title'.
  - \* Remove the 'Reading Quiz 3' filter for the list of event logs and display events for all assessments.
