

changes for 7/15/05 version:

- revised top page to have action links in a separate column
- combined "Edit" and "Properties" links to either be "View Properties" or "Edit Properties"
- combined "Add Item" and "Add Folder" to "Add" and then changed default "Add" item for folders to be the folder item
- added multiple folder dropdown menu on ad folder page

changes for 4/24/05 version:

- major revision

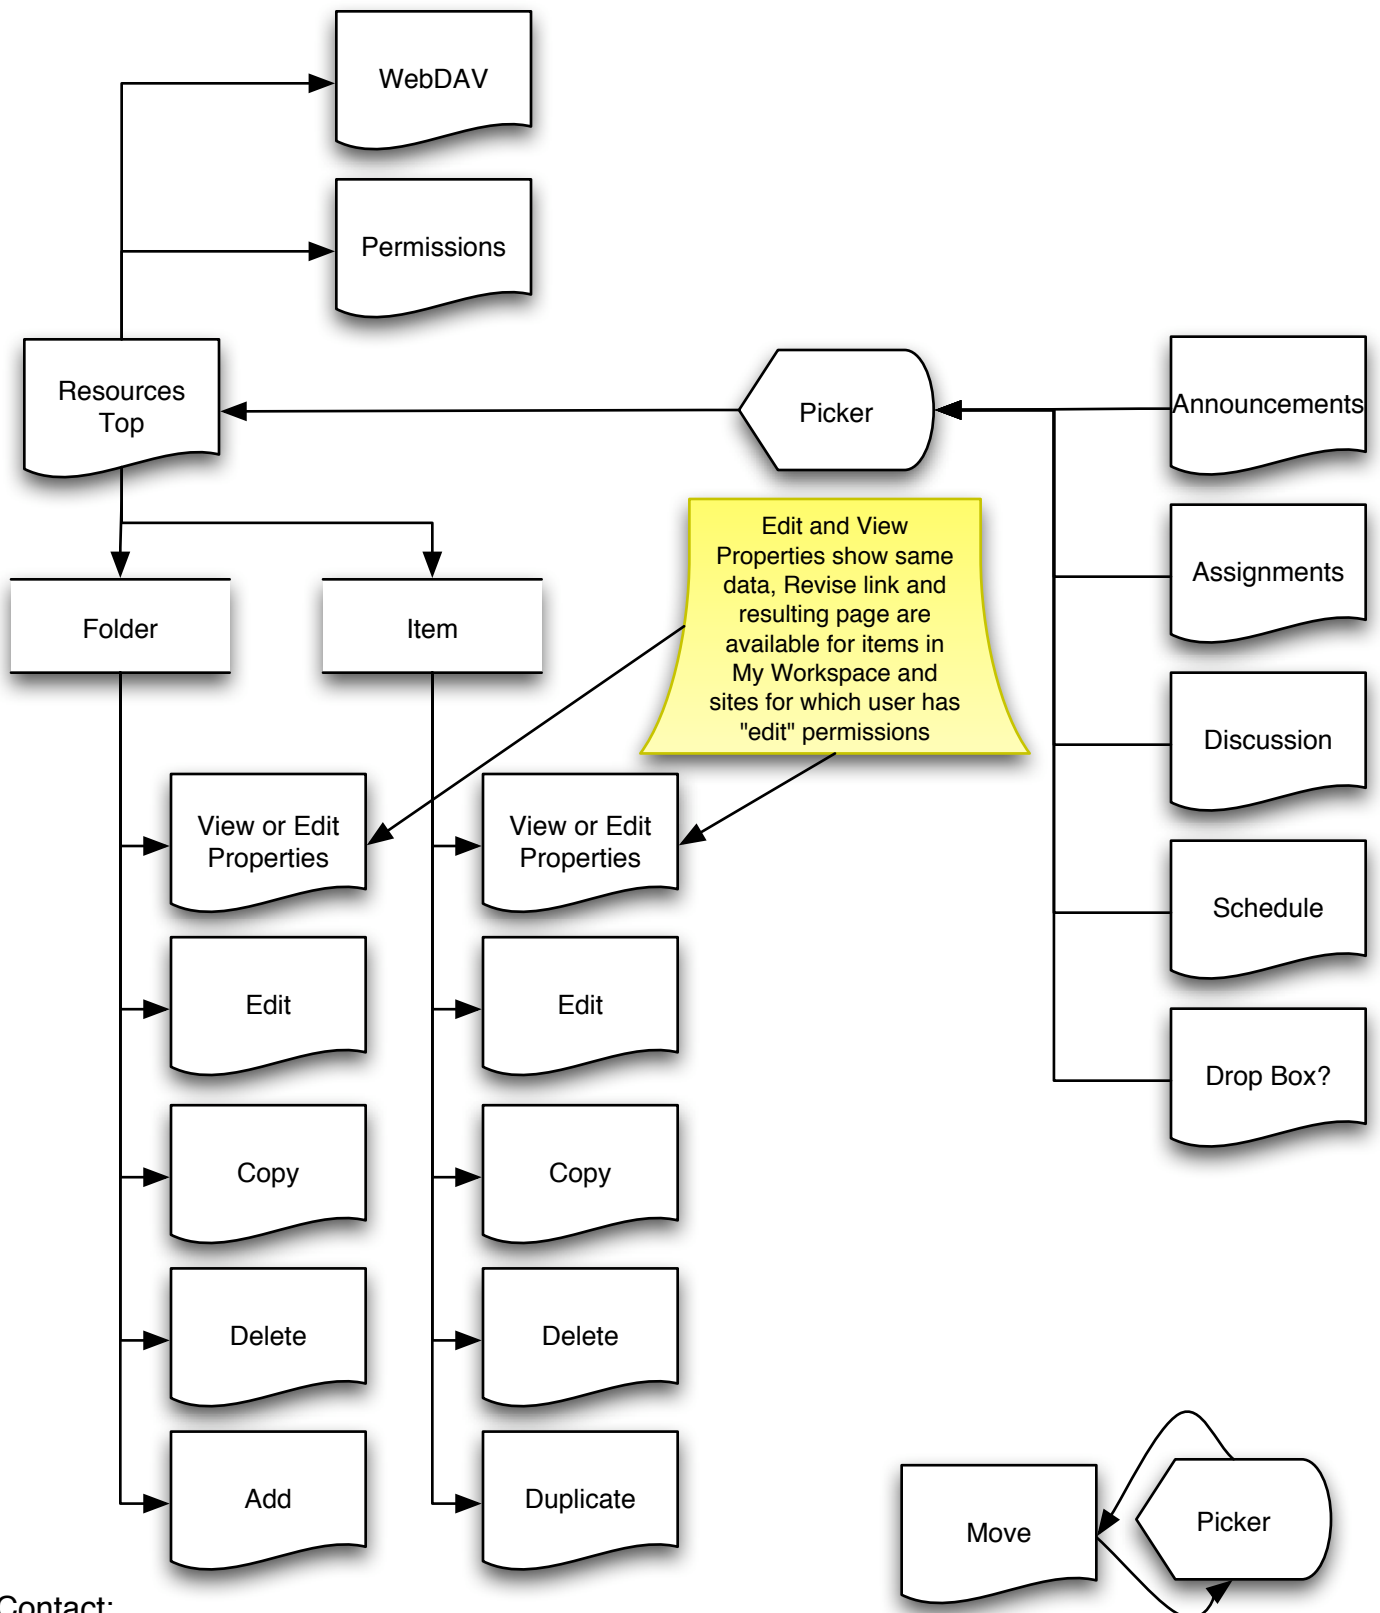

changes for 4/21/05 version:

- added more link descriptions (post-its) to Repository Top page
- added My Workspace  and site  icons (placeholders until new icons are made or permission for use is granted)
- removed Closer Picker buttons in pickers and put initial "select item" in blank text box
- organized Top and picker into My Workspace, My Class Sites, My Project Sites, and My Portfolio Sites

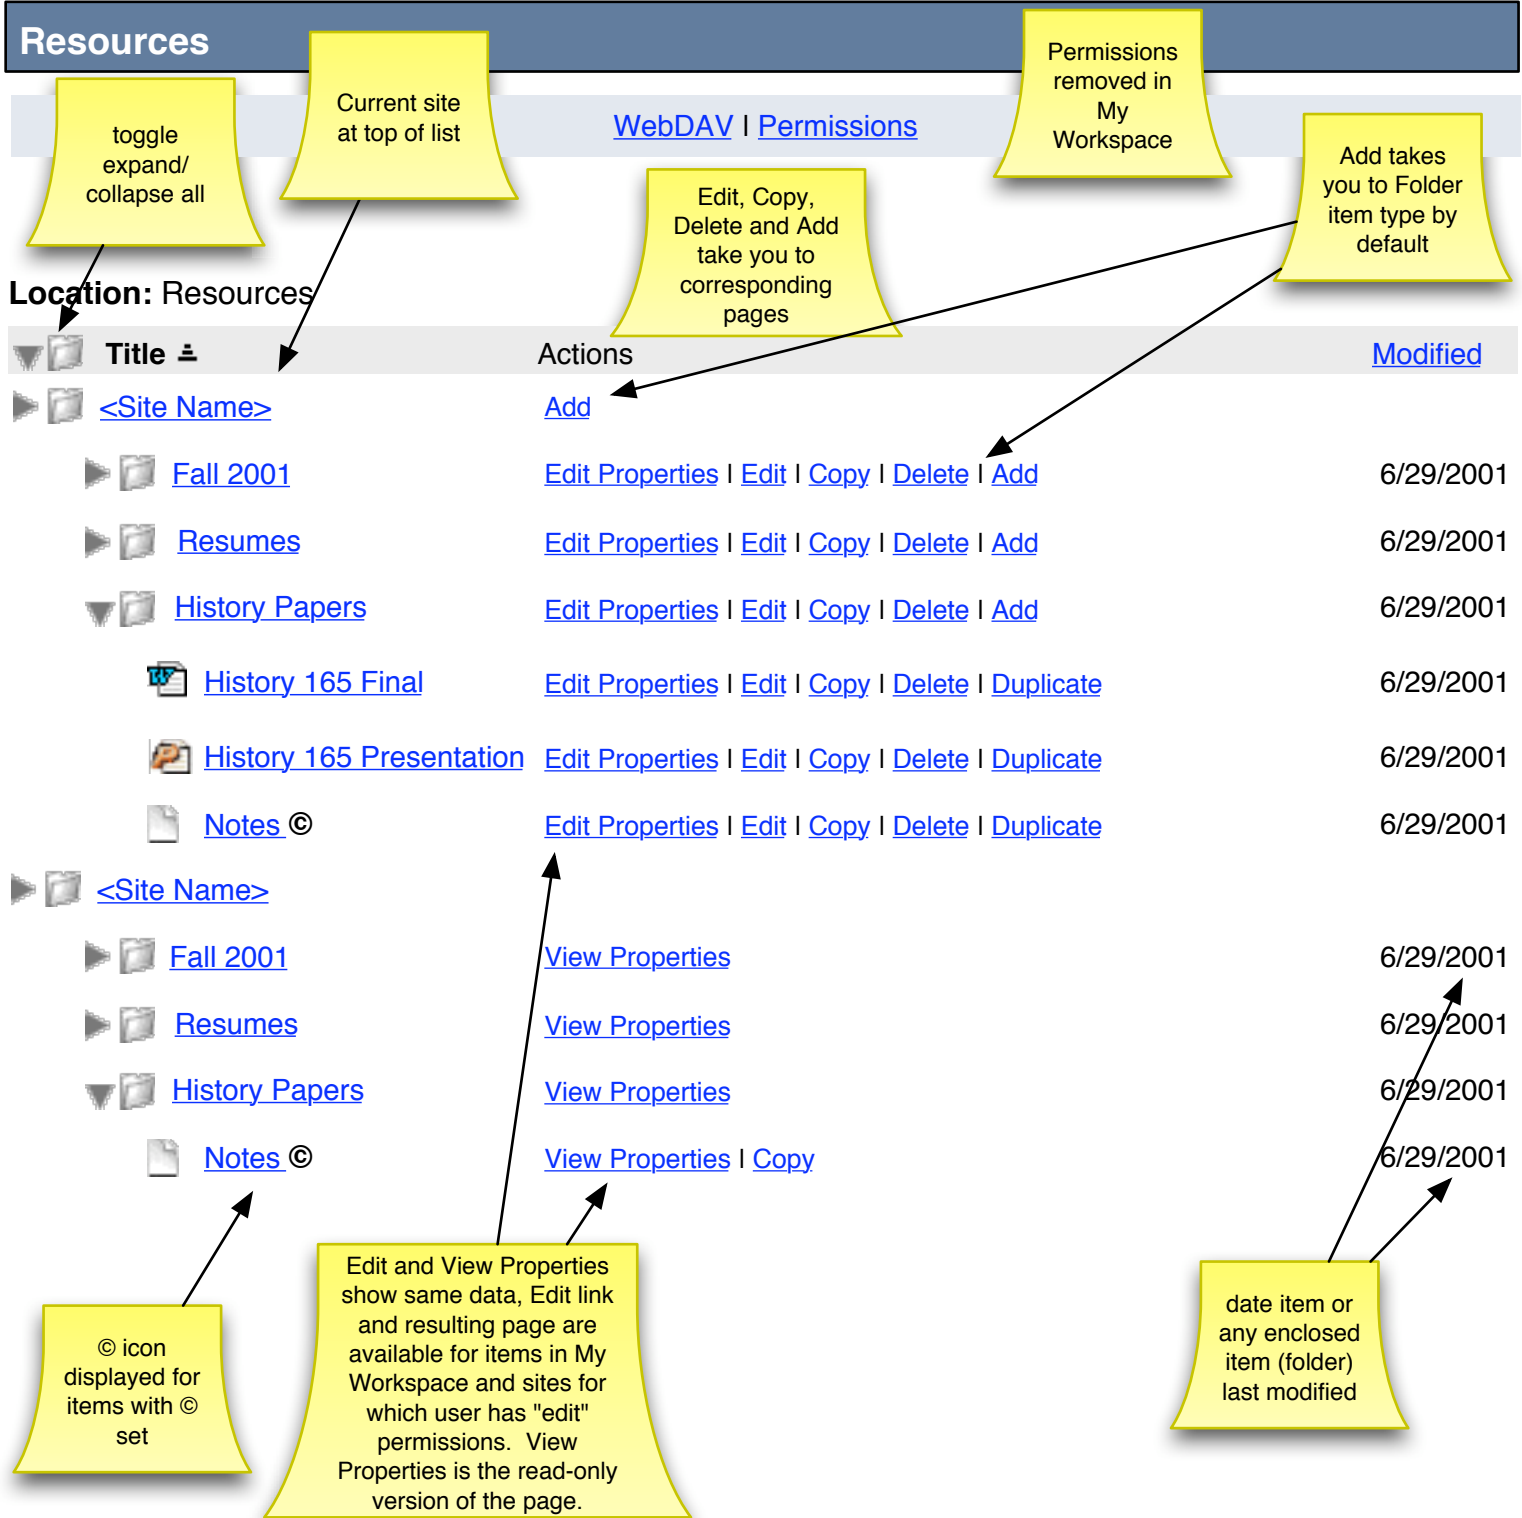

ToDo:

- extension or filename for text/html item type
- edit screens for other items types

WYSIWYG
here

Text/HTML Page

The image shows the Sakai WYSIWYG text editor. The toolbar at the top includes a font dropdown set to 'Arial', a font size dropdown set to '1 (8 pt)', and buttons for text color, background color, bold (B), italic (I), underline (U), strikethrough (ABC), subscript (x₂), and superscript (x²). There are also alignment buttons (left, center, right, justified) and a list/bulleted list button. Below the toolbar is a large text area for editing. A yellow callout bubble points to the superscript button with the text 'standard Sakai WYSIWYG here'.
