Type, Introduction, and Metadata

Availability

This assessment can be taken by all site members by only selected groups... anonymously (no login)

preposition "by" is in menu because of "anonymously" option

corrected inconsistency here (was "This assessment is available to" in some places

It is due at any time (if left blank) and has a time limit of 0 min. (no limit if 0)

Add exceptions for groups and individuals...

Per Brian, hiding fields to add overriding exceptions until click button. To me this doesn't save much space or screen real estate, so I would consider it optional

Late submissions accepted? Yes, until No, submissions not accepted after due date

(if no date specified, then indefinitely)

hour and min pulldowns replaced with single textbox. Will require validation, preferably real time but if not, then when save is attempted. Please advise on which validation is possible and I will write error messages

Availability settings including 'This assessment can be taken by all site members', 'beginning immediately (if left blank)', 'It is due at any time (if left blank)', and '0 min. (no limit if 0)'. Includes a section for 'Overriding exceptions to dates and time limit(s) above will be made for:' with a text input field and a note: 'If user doesn't fill anything in here before saving settings, this exceptions section will again collapse during subsequent visits.' Also includes 'Late submissions accepted?' with radio buttons for 'Yes, until' and 'No, submissions not accepted after due date'.

A. Default settings for Availability with overrides open

note, that if these date fields are left blank, you will see grey text indicating what effect that will have. We can add "(if left blank)" to those fields, but I don't think it is necessary.

If user doesn't fill anything in here before saving settings, this exceptions section will again collapse during subsequent visits.

Type, Introduction, and Metadata

Availability

This assessment can be taken  by default beginning  It is due  and has time limit of  min. (no limit if 0)

While I could remove "by default" above, it needs to be clear these are the default settings

Overriding exceptions to dates and time limit above will be made for:

	beginning	It is due	and has time limit of
<input checked="" type="checkbox"/> Extra Time Group	<input type="text" value="same as default"/>	<input type="text" value="same as default"/>	<input type="text" value="same as default"/> min.

Type name of individual or group

This has to say "same as default" rather than "same as above" because there could be multiple rows; everything is relative to default, not row above.

This field if blank will yield no time limit (as will "0") and has time limit of

This field if blank, will result in default time limit. Enter "0" to explicitly get no time limit

Original request to use multipliers (1.5x, 2x, etc.) was withdrawn for simplicity's sake.

Late submissions accepted?

Yes, until  (if no date specified, then indefinitely)

No, submissions not accepted after due date

(For students without previous submissions, saved assignments automatically submitted after due c
