Table edges not aligned with edges of widget, as other widgets and pages in My Workspace are

Only text is clickable, message icon looks clickable but isn't

"none" is more visually prominent than the clickable numbers and hard to ignore

Content of 2 columns are not under header

Table edges aligned with widget edges.

Message icon is clickable, along with number of messages

If Message tool not in site, show "--"; if it is but there are no messages, show "0" with link to Message tool.

Content of columns are under each header. Numbers are flush right, but centered.

Alignment might be handled by breaking each of these columns into two, with first right aligned and next left aligned

The width of the number column must be wide enough to accommodate 4 characters, but exact width doesn't really matter, so long as both number and icon are roughly centered.
