- B. The intermediary who provides connectivity and transport of cloud services between cloud providers and cloud consumers
- C. The person or entity responsible for keeping cloud services running for customers
- D. The person or entity responsible for transporting data across the Internet

Answer: B

Question: 2

Which security certification serves as a general framework that can be applied to any type of system or application?

- A. ISO/IEC 27001
- B. PCI DSS
- C. FIPS 140-2
- D. NIST SP 800-53

Answer: A

Question: 3

At which phase of the SDLC process should security begin participating?

- A. Requirements gathering
- B. Requirements analysis
- C. Design
- D. Testing

Answer: A

Question: 4

Which of the following is the correct name for Tier II of the Uptime Institute Data Center Site Infrastructure Tier Standard Topology?

- A. Concurrently Maintainable Site Infrastructure

- B. Fault-Tolerant Site Infrastructure
- C. Basic Site Infrastructure
- D. Redundant Site Infrastructure Capacity Components

Answer: D

Question: 5

You have been tasked with creating an audit scope statement and are making your project outline. Which of the following is NOT typically included in an audit scope statement?

- A. Statement of purpose
- B. Deliverables
- C. Classification
- D. Costs

Answer: D

Question: 6

Different types of cloud deployment models use different types of storage from traditional data centers, along with many new types of software platforms for deploying applications and configurations. Which of the following is NOT a storage type used within a cloud environment?

- A. Docker
- B. Object
- C. Structured
- D. Volume

Answer: A

Question: 7

Who is ultimately responsible for a data breach that includes personally identifiable information (PII), in the event of negligence on the part of the cloud provider?

- A. The user
- B. The subject
- C. The cloud provider
- D. The cloud customer

Answer: D

Question: 8

Which of the following is not a reason for conducting audits?

- A. Regulatory compliance
- B. User satisfaction
- C. Determination of service quality
- D. Security assurance

Answer: B

Question: 9

Under EU law, a cloud customer who gives sensitive data to a cloud provider is still legally responsible for the damages resulting from a data breach caused by the provider; the EU would say that it is the cloud customer's fault for choosing the wrong provider.

This is an example of insufficient _____.

- A. Proof
- B. Evidence
- C. Due diligence
- D. Application of reasonableness

Answer: C

Question: 10

Which ISO standard refers to addressing security risks in a supply chain?

- A. ISO 27001
- B. ISO/IEC 28000:2007
- C. ISO 18799
- D. ISO 31000:2009

Answer: B

Question: 11

When an organization implements an SIEM solution and begins aggregating event data, the configured event sources are only valid at the time it was configured. Application modifications, patching, and other upgrades will change the events generated and how they are represented over time.

What process is necessary to ensure events are collected and processed with this in mind?

- A. Continual review
- B. Continuous optimization
- C. Aggregation updates
- D. Event elasticity

Answer: B

Question: 12
